Professional solution

Rameder with inexpensive towbars for the Mercedes Vito

Professional work is not only fun, it also needs a lot of space: tools, spares, materials, machines – all this has to get to customers or to the construction site one way or another. For example, with a Mercedes Vito, which, depending on the version, will carry up to 6.6m³. If this shouldn't suffice, **Rameder** has the right towbar for you.

Europe's largest provider of automotive transport accessories sells the removable towbar including a 13-pole electrical kit for only Euro 308 in its own online shop at www.rameder.eu. The lever system makes the removable towbar very easy to use. It provides a bearing load of 75kg. The Vito may thus tow up to 2,500kg. A mini-excavator, a compressor or other light construction machinery will be on site in a jiffy. But you can also use the useful hook in your free time. Equestrians can take two horses with them or bikers their bicycle into the Alps.
